ReimagineSA NPC is an Impact Think Tank that uses Ubuntu to Organise, Connect and Enable.
How do we leverage the Club of Rome network to better serve intergenerational needs?

How do we leverage technology for outcomes monitoring and evaluation to ensure impact measurability?

How do we connect to co-funders and execution partners to better ensure sustainability beyond youth summit?

Our global communities need a more considered approach to co-creating and delivering a combined future. The pervasive knee-jerk “any action is better than inaction” can cause more damage than good. ReimagineSA believes we need to have intergenerational courageous conversations that work to craft progressive frameworks that enable exponential impact that is measurable.

Climate change is the most pressing global challenge, constituting an existential threat to humanity. Planning for climate emergency is a pragmatic response to a known risk and humanity’s insurance plan for survival and a positive future.

A shift from mainstream economics and policy-making based on fundamentally flawed economic theories and indicators promoting a growth-centric philosophy rather than the wellbeing of people and the planet, is necessary to ensure the reversal of a crucial ecosystem, climate and social tipping points.
The global financial system is currently at the service of an outdated economic paradigm. It acts as a means of wealth accumulation for a narrow elite, whilst disregarding the negative effects of environmental damage and social inequalities.

# Building on Youth Summit success

The Club of Rome Youth Summit brought together some of the world’s greatest minds, allowing Youth Leaders to engage in core quandaries faced in our world today. The discussions across the Youth Summit and the Public Conference highlighted systemic root issues, opportunities for change, areas to reform, and the need and opportunity for youth to actively make a difference. Furthermore, this platform provided a safe space for us to learn, challenge, collaborate and form global partnerships in addressing these issues. We believe this platform can be formalized into a The Club of Rome Youth Secretariat in order to further expand on intergenerational collaboration and provide mentorship and opportunity for the Youth to create change.

# The Concept

The Club of Rome Youth Secretariat would be a formalised global network of Youth who are actively engaged with one another and the Members of The Club of Rome network on an ongoing basis in order to effectively collaborate in key impact areas. This would include an online space/app whereby transnational communication and development would occur. It would also include regional development hubs whereby members could recruit coordinators on the ground, develop localised solutions and develop proposals to present to The Club of Rome.

# The Objectives

- Bringing Youth, insight and collaboration to the key impact areas
- The COR mentorship will allow appropriate investment in the Youth’s capacity to collaborate intergenerationally
- Bringing intergenerational perspectives together as equal voices in key COR impact areas

# What We Need

- Mentorship and leadership development
- Representation at global conversations
- Incubation, resources and investment into projects
- The drive to bring about systemic change
- The perspectives, purpose and potential
- New ways of collaborating and doing business
- Skills to bring proposal to fruition (i.e. development, writing etc.)

# What We Have

- Develop a COR app/online communication for mentorship, events, meetings etc.
- Integrate Populate app with COR Youth and COR Members willing to engage
- Engage Utilisation of the app for project development, ongoing meetings and resource sharing
- Expand Once COR Youth and COR Members are settled in communication, expand into regional hubs for solution development

# Next Steps

- Engage with COR Members for feedback on Youth Secretariat Pitch
- If positive, COR Youth network will develop a full proposal with further details for the usage of the app
